Projects

MULTIMODAL AND MUTILINGUAL HATE SPEECH DETECTION SYSTEM

[Link](#)

Description:-

[Code](#)

- Developed a multi-modal multilingual hate speech detection system aimed at flagging hateful memes and fostering a safer digital environment.
- Used state-of-the-art machine learning techniques, this project integrated textual, visual data sources to comprehensively analyze and identify hate speech across various languages and modalities.

RESTAURANT WEBSITE

[Link](#)

Description:-

[Code](#)

- This is a front end page of a restaurant website which I created using HTML and CSS only, by applying the basic and intermediate concepts of flex-box and media queries.
- The Hungry Hub is a website that showcases a healthy food menu, with a goal to promote healthy eating habits.

CURRENCY CONVERTER

[Link](#)

Description:-

[Code](#)

- The Currency Converter is a web-based tool that swiftly converts between currencies using real-time exchange rates fetched from a currency API.
- It offers a user-friendly interface, displaying exchange rates and converted amounts, and visually represents selected currencies with flags.
- With its responsive design, users can effortlessly input amounts, select currencies, and retrieve conversion results with ease.
